

```
5  int main() {  
6      int a = 100;  
7      long long b = 9876543210;  
8      unsigned int c = 500;  
9  
10     cout << "Integer = " << a << endl;  
11     cout << "Long Long = " << b << endl;  
12     cout << "Unsigned Integer = " << c << endl;  
13  
14     cout << "\nSizes (in bytes):" << endl;  
15     cout << "int = " << sizeof(a) << endl;  
16     cout << "long long = " << sizeof(b) << endl;  
17     cout << "unsigned int = " << sizeof(c) << endl;  
18  
19     return 0;  
20 }
```

Integer = 100
Long Long = 9876543210
Unsigned Integer = 500

Sizes (in bytes):

int = 4
long long = 8
unsigned int = 4
